These are a rich source of information on the history and social development of BC. In the 19th century the Sessional Papers included: voters lists by district; committee reports; orders of the day; petitions & papers presented; records of land sales; correspondence; (budgetary) estimates; and departmental reports. As the 19th century waned much of the content in the Sessional Papers was subsumed into the Journals of the Legislative Assembly or published in separate volumes. By the 1920s, they primarily contain annual reports from government Ministries. Content not transferred to the Journals includes the Voters' List - which was published on its own and the Estimates - which were published by the Ministry of Finance.

Office of the Custodian of Enemy Property:

Index, 1942 - 1951. AW1.R-7731 ^[1]

Available reels: C9299-C9304, Volumes 1- 6, which comprise **the index** to the case files from the Vancouver Office of the Custodian of Enemy Property. UBC Library **does not** own the Case Files. The Case Files have not been filmed and access to them is restricted for privacy reasons. They may *only* be accessed by researchers who have first applied to Library and Archives Canada for permission.

The Vancouver office file system included an extensive series of case files, one for each Japanese Canadian over the age of sixteen who was removed from the coastal area of British Columbia. The Case files are arranged numerically. An alphabetical index is available. This index gives the name and address of the individual, the case file number, family members and their file numbers, and sometimes the relocation address. The microfilm conversion list indicates on what reel a particular case file is located.
